

Burnish-Glo

BURNISH-GLO is a mildly alkaline compound formulated for providing a clean bright finish on steel and ferrous alloys. Cleaning agents incorporated in it will remove light process oils and dirt from parts.

Typical concentration with steel media is 1 to 2 oz/gallon water.

TYPICAL PROPERTIES:

- Appearance - Tan powder
- pH 5% - 8.5

BURNISH-GLO results in a bright finish color and maintains clean steel media. This product contains no chelators or silicates that would affect waste treatment streams.

Read Material Safety Data Sheet before using this product.
