

RP-5151

Rust Preventive 5151 is a rust preventive compound intended for use in spray applications. It will prevent rusting of active, clean steel, even when wet.

RP-5151 works well where protection for indoor storage is required along with ease of handling and economical costs. It forms a film that prevents iron from forming the iron oxide rust. The film will rinse off easily in any cleaner, is non-oil, and is compatible with most water-soluble paint formulations.

Rust Preventive 5151 mixes easily with water and is compatible with a wide variety of water conditions. The strength of **RP-5151** required will vary according to the type of steel, its degree of cleanliness and activity, and contaminants on the parts. Normally, **2 to 5%** is sufficient. **RP-5151** can be sprayed at any temperature convenient to your operation.

Typical Specifications:

Color	- Clear amber liquid
Specific Gravity	- 1.05
pH @ 100%	- 8.5 to 9.5
pH @ 5%	- 7.5 to 8.5

The benefits of using **RP-5151** are:

- Easy to use short-term protection
- Economical
- Non-staining coating

Read Material Safety Data Sheet before using this product.
